

## FlexSecurITy, Powered by FlexITy, Partners with Okta to Secure Cloud for the Canadian Market

### FlexSecurITy – The Evolution of CyberSecurITy

TORONTO, June 4th 2020 - As organizations transform their business to leverage the power and flexibility of hybrid and public cloud computing, new risks emerge around managing digital identities and access to systems and data. The challenges of a greatly expanded remote workforce have recently compounded these issues and accelerated the need for enhanced security solutions. FlexITy and Okta are empowering organizations to securely adopt new ways of delivering service to their customers on modern platforms.

“Okta’s mission is to enable every organization to seamlessly and securely use any technology,” said Patrick McCue, SVP Worldwide Partners, Okta. “With FlexITy expanding its expertise to provide its customers with Next Generation Managed Cyber Security Services, organizations looking to secure their digital transformation have reliable and secure solutions to adopt cloud delivery models and embrace new ways of interacting with their customers. We’re excited about this move by FlexITy to standardize on Okta for identity and access management solutions to enable these outcomes”.

“FlexITy enables our customers to effectively mitigate cyber security risk by protecting critical systems and data. Identity and access management is a key element of reducing attack vectors and ensuring compliance with regulations and security best practices.” explained Brad Riddell, VP of CyberSecurity, FlexSecurITy. “We selected Okta as our lead partner in identity and access management for our own corporate use and for our Managed Security Services offerings.”

This partnership with Okta allows FlexSecurITy to secure the Canadian workplace with the best tools and protection of their data. It will structure a digital workspace for client’s employees, allowing freedom, efficiency and safety to work remotely across a diverse set of devices, applications and network infrastructure. It’s a strategic partnership to facilitate secure cloud migrations, promote a connected digital workspace and boost employee productivity.

## About FlexITy

FlexITy is an award-winning integrator of smart technology, CyberSecurITy and service solutions, built on powerful and digitally advanced secure platforms, and delivered with decades of expertise, is headquartered in Richmond Hill, with offices in Toronto and Winnipeg.

FlexSecurITy is a next-generation cybersecurity offering enabling organizations to protect the way people work today from advanced threats and compliance risks. FlexSecurITy protects organizations from the advanced attacks targeting them and protects the critical information people create while arming organizations with the right intelligence and tools to respond quickly when things go wrong.

FlexHealth-Powered by FlexITy is a suite of patient-centric solutions that integrate interactive mobile applications, secure health IT and data, and optimize healthcare management. FlexHealth engages patients and families, empowers clinicians and delivers outcomes that matter.

FlexTEL, a leading and secure managed business communications solution provides voice, data, converged, and managed services for businesses and enterprises that need a proven, responsive, costeffective alternative to the phone and cable monopolies.
